(oil soak and/or conditioning)

Saddle Inspections and Repairs

NCEQ has partnered with local reputable and experienced businesses to provide inspection and repair services. If you would like NCEQ to have your saddles inspected and/or repaired, it will be done before any cleaning is completed. Inspection and repair services will be invoiced separate from the tack cleaning services. Tack will not be picked up from these businesses and cleaned by NCEQ until all inspection and repair invoices have been paid to NCEQ.

Saddle cleaning includes one set of stirrups.

NCEQ will consult with the client on the best cleaning option for their tack.

Oiling and/or conditioning leather may cause leather to darken. Upon request, NCEQ will test an inconspicuous area of the leather (for saddles under seat jockey or skirt) and provide possible color change result to customer for approval to continue with a plan on final services to be performed.
